Aaron Fleshner

Lead Android Engineer at Digital Turbine
Mebane, North Carolina, United States

Summary

As a seasoned Android Engineer, I bring a wealth of experience, having contributed to applications of varying complexity – from basic forms to dynamic social networks. My creative energy thrives in finding novel ways to present information to users, With a keen eye on enhancing the user experience, my focus revolves around delivering essential information effectively." I enjoy the creative process and excel in pushing the limits of what is possible in the mobile space.

Experience

Digital Turbine

Lead Android Engineer
March 2024 - Present (2 years 8 months)
Durham, North Carolina, United States

- Contribute to and guide the modern Re-ignite project, driving full-lifecycle development for a hybrid Android app delivery platform built with Kotlin, Jetpack Compose, and native Android views, featuring an embedded Vue 3 WebView and native notification systems.

- Integrate AI-driven development workflows into daily engineering processes to accelerate feature delivery, automate repetitive boilerplate, and optimize code architecture.

- Own end-to-end feature delivery and core architectural scaling across distributed engineering teams, taking complete responsibility for technical execution from design through QA.

- Develop and maintain high-performance frameworks around the core platform to streamline the build process, improve deployment speed, and enforce architectural accuracy.

lululemon

Senior Android Engineer
April 2022 - January 2024 (1 year 10 months)
United States

During my tenure as a Senior Android Engineer at Lululemon, I played a pivotal role in enhancing the Lululemon Studio Mirror's companion app. This innovative workout mirror streams live and on-demand workouts to any room in your home. In this role, I collaborated seamlessly with cross-functional, fully remote teams of engineers, designers, and project managers situated throughout the country.My contributions included building integrations with third-party applications, significantly expanding the companion app's capabilities for seamless information sharing. Additionally, I proactively identified and resolved UI/UX discrepancies between the Android and iOS versions of the app. Notably, I spearheaded the development of the ground-up integration that brought in-app subscriptions to the Lululemon Studio application, further enriching the user experience.

In summary, my work as a Senior Android Engineer at Lululemon was marked by a strong commitment to innovation and collaboration, resulting in tangible improvements to the companion app for the Lululemon Studio Mirror.

WhiteStar Communications, Inc.
Senior Android Engineer
September 2019 - March 2022 (2 years 7 months)
Raleigh-Durham-Chapel Hill Area

As a Senior Mobile Developer at WhiteStar Communications Inc., I was the lead designer/developer for the Society Secure Messenger Android Application. Society is an Instant Messaging application that uses a custom-built proprietary library called WhiteStar to create secure communications platforms that do not require a cloud. I collaborated with Desktop and iOS teams working across all platforms to create a seamless application that anyone can launch and use. I also played a supporting role helping to build out features on the iOS version of Society. This involved cross platform architecture design and porting the WhiteStar library to C++ to run on iOS and communicate with Android, Windows, and MacOS devices in the WhiteStar network.

Digital Turbine

Android Engineer

June 2017 - September 2019 (2 years 4 months)

Durham, North Carolina

As an Android engineer my primary responsibility was feature development for Digital Turbine's app delivery Ignite platform. I collaborated with multiple project managers, developers, and QA Engineers all over the world to build and expand on Core and UI/UX features. Other responsibilities included building frameworks around the platform to help improve the speed and accuracy of development during the build process.
